Our Company

DBC corporation is an international trading and investigating market company (EMC) , which started in 2019 in Iran. This company wants to expand its following activities with the members of Eurasia Union and European Countries, in addition to East Asian Countries. Right now this company is exporting Isfahan's Stone as profitable good of Isfahan. And we are trying to improve the capacity of exporting of this good to the countries like China, Italy, and ect. DBC Export Management Company, with its close relationship with Iran's mines, especially Isfahan, has the ability to supply all kinds of Iranian stones. Also, by having a smart team in the field of stone trading, it is ready to cooperate with all businessmen, stone processing companies, project workers and final stone consumers around the world. DBC strives to gain customer satisfaction primarily through the entire procurement process, as well as to continue its after-sales service. Our products are available in Marble, Travertine, Onyx and Granite in blocks, boulders and tiles in unlimited sizes.

Takab travertine

Introduction to Takab travertine

Takab travertine has a light cream background to a chocolate background, the light colors of which tend to be white. Takab travertine stone has different working chests that are extracted in different colors. This stone is processed in two forms, wavy (v) and non-wavy (c), in sabbed and leather type.

Application and benefits

Takab travertine is used like other travertine stones in the main facade and interior facade of the building. Also, the use of weak varieties of this stone is used to prepare the stone table, the lid.
